Visa® is at the forefront of the financial revolution, and we look forward to working hand in hand to provide every RevoluPAY user with the most advanced financial technology available worldwide."

RevoluPAY Affiliate Member of Visa®

This outstanding milestone highlights the prowess of the financial technology the Company has developed over the previous handful of years and the ultimate recognition from a company that management considers to be the veritable leader in cutting-edge financial technology, Visa®. Not only is the ability to autonomously issue Visa Cards a massive advantage for the Company, but the ability to directly acquire transactions within the Visa® system is a mammoth achievement for any Fintech Neobank. Incorporating the innovative Visa Direct® instant payment program into RevoluPAY nullifies the world's borders, eradicating barriers of clumsy and archaic Swift, ACH, or SEPA bank transfers. Such efficiency benefits billions of unbanked citizens worldwide or those disenchanted with high street banks as Open Banking begins to transform our financial landscape. Today's consumer seeks an instant means to transact anywhere on earth for the lowest possible cost, which RevoluPAY has achieved and will continue to propose. The inherent benefits of this Visa® landmark technology alone are highly advantageous to many of the Company's existing revenue verticals, undoubtedly rendering RevoluPAY the go-to banking app of the future. Visa® TAP-TO-PHONE is another unique technology that will thrust RevoluPAY into the higher echelons of mobile banking, liberating phone-based banking and making the decades-old plastic cards virtually extinct. The Company considers this new direct alliance with Visa® as a pivotal moment, allowing us to provide the services that our users seek.

Additionally, white-label partners can reap the rewards of a relationship with RevoluPAY, securely handling unlimited financial transactions through our financial licenses and technology. Likewise, a complete package of white-labeled payment cards allied to a white-labeled payment app deployable globally could radically transform many companies. Whether it be DCEs ("Digital Currency Exchanges") pursuing an end-to-end financial ecosystem for their users, a telecommunications company seeking to enrichen their ability to crossover into the banking world, or 100s of other businesses who desire a crossover into the financial world as a means of generating additional revenue from their abundant existing users. White-labelling of this now complete financial technology package, in partnership with large, medium, or small enterprises, is the future of RevoluPAY. Shareholders and management see this path as the future of financial technology and the financial world.
